
VIRUS PURIFICATION THROUGH 25% SUCROSE

MATERIALS

1. Ultracentrifuge
2. ultracentrifugation tubes
3. 10cm sterile petri dishes

VIRUS PURIFICATION THROUGH 25% SUCROSE

METHODS

1. Turn on ultracentrifuge, place rotor inside, close lid, set temperature to 4°C and start vacuum
2. Cool buckets in refrigerator.
3. Sterilise ultracentrifuge tubes
 - Fill each tube with 70% ethanol & leave in MSC hood for 2-5 minutes
 - Empty tubes (? recycle ethanol) & leave in hood to dry for 10 minutes
